

Writing Technical Reports

Virtual Nine hours

Good reports and recommendations move projects forward and help readers make the best decisions. They can be challenging to write, since it's easy to get bogged down in all the data you want to convey.

This virtual course shows you how to write complex documents that are easy for readers to understand and act on. It provides strategies and techniques to ensure your reports, recommendations, project updates, procedures and business plans are clear, concise and persuasive.

This course is ideal for those who need to write complex documents that are clear, readable and persuasive.

- get right to the point without rambling

What to expect

We know people learn best by doing, so this course gives you many opportunities to practice as you learn. You participate in both group and individual learning projects and receive coaching from your facilitator. You use samples of your own reports to assess your writing and pinpoint areas for improvement. As well, you plan and write a report on a topic of your choice so you can immediately apply your new skills.

You receive a comprehensive manual containing checklists and other job aids to help transfer what you have learned to your back-at-work writing.
